

Softly, softly

Upgrade to the luxury of a 50-litre hidden soft-close bin — ideal for use in the kitchen and laundry

Modern families know that keeping mess and waste in the kitchen under control is a top priority. Launched for the first time in April at Australia's number one design fair, designEx, the 50-litre hidden bin is a new addition to the Hideaway Soft Close range.

The hidden functionality and extra-large storage capacity make this bin ideal for use in the kitchen of a larger family or alternatively in the laundry as a hidden laundry hamper.

The friction-fit lid also features an anti-bacterial Clinikill powder-coat finish that helps fight bacteria, keeping the bin solution hygienic and locking away smells.

All bins in the Hideaway Soft Close range come complete with ball-bearing, soft-close tracks that ensure every close is carefully controlled. The air vacuum dampener prevents the unit from slamming. A weight capacity of 45kg across the tracks ensures the strength and durability of the bins.

The Hideaway Soft Close range also includes a double twin bin system, which is ideal for rubbish and recycling, available with either double 15- or 20-litre buckets.

With a range of easy-to-remove bucket sizes available, it's easy to customise a pull-out, hidden soft-close bin for your home. These bins are not just designed for the kitchen — they are great in the laundry and bathroom, too.
