hideawaybins.co.nz

Manage, sort and store your waste, recycling and laundry with a Hideaway waste/recycling bin solution or laundry hamper.

A leading-edge, practical hidden bin system that fits effortlessly into your environment to assist with everything from hygienically disposing of waste and sorting your recycling to separating and storing your laundry.

Three intelligently designed, New Zealand made ranges are available: Concelo®, Soft Close, and Compact, offering a simple and stylish space-saving solution.

With each of the three ranges offering distinctive features, there is sure to be a Hideaway Bin to suit the requirements of any residential or commercial project.

Our Waste Management Guide on pages 3/4 will help you decide which Hideaway Bin is right for you.

Our Hideaway Bin systems are designed and produced to help our customers to achieve more sustainable waste practices within their own homes and workplaces.

As a manufacturing business and as individual New Zealanders, we recognise and value the unique and precious environment we live and work within. We strive to protect this environment through responsible business practices and sustainable waste and recycling habits.

The topic of managing waste and recycling has never been stronger, and the team at Hideaway Bins take great pride in responsibly recycling and re-using products within our business and manufacturing processes.

To ensure this, we have put a number of practices in place so that our environmental impact is reduced and our products are environmentally friendly.

This includes:

- Ensuring that we re-use cardboard and plastic packaging.
- We recycle waste cardboard, plastic packaging and any metal rejects.
- Our plastic buckets are made from 100% virgin material – making them completely recyclable.
- The waste from the moulding process is ground for re-use by others.

WASTE MANAGEMENT GUIDE

WHICH BIN DO YOU NEED?

Start here to choose your bin solution

Did you know that your bin is the most used appliance in your home?

With that in mind, it's important to choose a bin system that's simple to use, durable, easy to clean and one that makes your everyday waste and recycling routine effortless.

A Hideaway Bin solution will help you create sustainable waste and recycling practices in your household with as little impact to your lifestyle as possible.

As a nation, we are not great recyclers, and the majority of waste still goes to landfill. This not only wastes money, it is environmentally unsustainable.

A key to improving recycling and reducing waste is having a good waste management system.

Move through the 4 steps on the opposite page to give you a guide as to which Hideaway Bin solution would be suitable for your kitchen and your family.

For more information visit: hideawaybins.co.nz

1 - How many buckets?

The number of buckets required depends on how many waste streams the waste needs to be separated into, and where those waste streams go.

Check with your local council: what is collected by local councils now, and what is planned for the future? Some councils use a comingled recycling system, while others separate recycling. Many councils are introducing organic (food scrap) collections in the future.

Consider your lifestyle – do you want to home compost food scraps? Would you like to separate soft plastics for recycling?

2 - What size bucket?

To calculate the volume of waste generated, consider the number of people in your home (see opposite).

Consider how often you want to empty your bin, and how much space you have.

3 - Bucket placement

Consider where waste is generated in your home, and where space is available to collect waste.

- 60-70% of all household waste is generated in the kitchen, making it critical to consider the optimal waste management system for this area.
- Will all kitchen waste buckets be combined in one bin unit or be separated into two bin units? Using two bin units allows greater design flexibility.
- Consider ergonomics: keep in mind the bin is used 30+ times per day. Installing at bench height is recommended.
- Waste is also generated in the bathroom, and this typically includes items that can be recycled.

4 - Functional bin system

An important part of the waste management equation is a durable, flexible and easy to clean bin system for your home.

The most common complaint about bin systems is they are dirty and smelly. Hideaway Bins are easy to clean, simplifying the removal of food and dirt traps, which can cause maintenance issues later if left unchecked. Hideaway Bins also have an innovative hands-free lid system to control odours.

Calculate the volume of waste your family produces each week

Based on 60 litres of waste per person, per week, categorised into: landfill, recycling and compost.

USE THE TABLE BELOW FOR STEP 2 OPPOSITE.

		1 Person	2 People	3 People	4 People
LANDFILL	43%	26L	52L	104L	156L
RECYCLING	50%	30L	60L	120L	180L
COMPOST	7%	4L	8L	16L	24L
X EMPTIED	100% of waste	2x 15L buckets	4x (60L)	8x (120L)	16x (240L)

EXAMPLE: with a twin 15L bin system, how often would you need to empty your bin each week? A larger bucket = fewer empties.

INNOVATIVE FEATURES

THAT SEPARATE
HIDEAWAY BINS
FROM THE REST

BENCH HEIGHT INSTALLATION

Most Hideaway Bins have the option of being mounted to the top of kitchen cabinets directly under the benchtop. This means the bins are at the optimal height for clearing waste directly off a benchtop. This reduces the amount of bending required when disposing of waste - remember, your waste bin is one of the appliances you use most in the kitchen.

BUILT IN LID

Hideaway is the pioneer of waste bins with a built in self closing lid. When you have a hand full of rubbish, you don't want to be juggling between opening a door and lifting a lid while trying not to spill rubbish.

The Hideaway lid is mounted to the top of the bin system inside the cabinet, and closes itself onto the buckets when the bin is closed, to control odours while still keeping your hands free.

EASY ACCESS TO REAR BUCKET

All Hideaway Bins are designed with over extension runners. This makes it easy to remove or empty the bin, without having to compromise on space and ergonomics. The rear bucket can be removed independently of the front bucket from beneath the bench top.

FLEXIBLE MOUNTING OPTIONS

Hideaway Bins are designed with a range of mounting options to suit the environment they are installed within. Top mounting for easy access, side mounting for additional support and floor mounting for flexibility in compact spaces.

Concelo®

REDEFINES

WHAT YOU SHOULD EXPECT FROM
YOUR MOST USED APPLIANCE

Concelo®, Hideaway's premium bin range and the new standard in waste bins and laundry hampers.

The Concelo® range is the result of seven years of research, development and testing. It builds on Hideaway's strong heritage of quality and innovation to create the next generation of premium hidden storage solutions.

The Concelo range has been designed to deliver a waste bin and laundry hamper without compromise. Every element of the range has been engineered and tested to ensure it delivers both the form and function that should be expected from a premium home appliance.

Concelo boasts not just a clean design aesthetic, but its Clip 'n' Clean features help keep your bin looking and smelling clean.

Managing waste can be a challenge, but Concelo is the easiest bin in the world to keep clean, while its new Active Lid helps control odours.

It not only takes all the best features you would expect from Hideaway and improves them, but it totally redefines what you should expect from your bin solution, wherever you need it.

MULTI-AWARD
WINNING PRODUCT

reddot award 2019
winner

"A sophisticated product solution, this kitchen waste bin convinces thanks to its automatic, odour controlling closing mechanism."

- Judge's comment, Germany 2019

AWISA 2018
GOLD STAR WINNER
FOR INNOVATIVE TECHNOLOGY

"Concelo is clever, smart, well designed and is superior to every other waste system on the market."

- Judge's comment, Australia 2018

Concelo.

THE PERFECT WASTE SOLUTION FOR THE

HOME OWNER

Clip'n'Clean components create a painless cleaning process with effortless removal, washing and reinstallation within moments.

Made from stain resistant polypropylene, components are easily cleaned with soapy water. Simply clip them back into position in seconds. Concelo's Clip'n'Clean trays are not only easy to clean, they avoid any potential food traps in difficult to reach spaces.

ACTIVE LID SYSTEM

Managing waste can be a challenge, especially the smell. Concelo overcomes this with its Active Lid designed to help control odours.

The Active Lid is hidden from sight at the top of the bin inside the cabinet, and drops down to close over the buckets when the unit is closed.

The motion of the lid is synchronized with the opening and closing action of the unit, which lets you keep your hands free to simply drop waste into the bin.

The Active Lid has been designed so that it can very easily be removed and re-installed with the help of a cleverly designed lid tool!

ACTIVE LID IN PLACE

Concelo Bin

GERMAN SYNCHRONISED OVER EXTENSION RUNNER

Häfele Matrix Runners - smooth synchronised runners with fluid damper for seamless quiet closing action – 45kg dynamic weight rating. Beautiful, sophisticated runners, equal to other premium drawers.

The over extension runner allows for easy access to the back bucket with bench height installation.

DESIGN FLEXIBILITY

One of Hideaway Bins unique points of difference has always been the ability to mount our bin systems to the top plate of a cabinet. This allows Hideaway Bins to be installed in cabinets in a variety of situations.

The updated Concelo can be mounted to the top plate of the cabinets using the NEW CRTMB Brackets. The brackets are supplied as an optional kit. They slot into the body and are bolted securely in place.

The new bracket design allows Concelo to be fitted in over width cabinets, providing strength and rigidity without the need for custom side packers. This is particularly useful for retrofit situations.

TECH SPECS FOR ALL MODELS

Mount Options
Side mount in standard cabinet widths, suits system 32 drilling. Mount to top plate of over width cabinets using CRTMB brackets.

Pull Type
Door.

Premium Soft Close Runners
Häfele Matrix runner. German made, 45kg soft close synchronized over extension runner with fluid damper, equal to premium drawers.

Materials:
Frame – 1.0mm zinc treated steel, powder coated.

Drawer sides – aluminium, powder coated. Concealed runners.

Active Lid / Clip'n'Clean Trays / buckets / liner holders – recyclable food grade, polypropylene.

Electronic Push To Open
Compatible with electronic push to open systems. Refer to page 12 for more information and technical specifications.

Bench Overhang Clearance
See page 18 and 19 for technical information.

FLEXIBLE MOUNTING OPTIONS

System 32 Side Mounting

Concelo has been designed with simplicity in mind. The entire range uses one System 32 drilling pattern to mount to the sides of the cabinet using high strength Euro screws. All models fit straight into standard cabinet widths with 16mm sides.

Top Mounting for over width cabinets

Concelo has been engineered to give design flexibility when needed. Concelo can be installed in over width cabinets by mounting to the top of the cabinet using the **NEW CRTMB Top Mount Brackets**. This gives designers the freedom to place the bin in the ideal position without compromising strength or rigidity, and no need for packers. See concelo.com for specs on maximum door sizes. This is particularly useful for retrofit situations.

Concelo® Laundry Hampers offer a sophisticated storage solution. Based on the same platform as the Red Dot award-winning Concelo® Waste Bin, the Concelo® Laundry system continues to raise the bar in what should be expected from a laundry hamper.

Hide your laundry, store your extra linen or use as a removable washing basket. Concelo Laundry Hampers can also be integrated into wardrobe or bathroom cabinetry to discreetly hide laundry.

Concelo Laundry Hampers are available in three sizes. Two 60L hampers can be installed side by side in your laundry to separate washing or choose the 1 x 35L or 2 x 35L hampers when space is at a premium. The large 60L hamper is big enough to cope with a family load of washing and the 35L hampers maximise space while still offering excellent storage capacity.

The light-weight hampers are easy to remove and feature air vents to reduce moisture and a solid base to prevent drips.

This innovative design is packed with features to suit the needs of the designer, the cabinet maker and the homeowner.

Ergonomic and functional, Concelo hampers are designed to withstand the weight of wet washing and look good doing it - a must for your laundry!

SOFT CLOSE MODELS

HIDDEN RECYCLING STATION

CR350-135D-W & CR350-213D-W

COMMERCIAL RECYCLING

Sustainable recycling practices in the workplace begin with making your recycling solution easy to use, durable and hygienic whilst remaining design focused.

Hidden from sight

Recycling bins placed in walkways can look unhygienic and be a real eye-sore. Integrate a hidden recycling station into a commercial environment to ensure a professional workplace with design front of mind.

Durability

The two ranges we recommend are: Concelo by Hideaway and Hideaway Soft Close. They have been designed with quality materials to ensure the units withstand the challenges posed in a commercial environment.

High quality runners are designed to hold up to 45kgs/52kgs and they over extend so the rear bucket can be easily removed from beneath the benchtop.

Hideaway buckets are made from virgin polypropylene which give them the durability to withstand the rigors of continual use in a commercial environment.

Smart Design Features

The control of odours is paramount within a commercial space. Hideaway Bins include a built-in lid that remains in the cupboard when the unit is open, but covers over the buckets when the unit is closed assisting in odour control.

See the Concelo range (page 17/18) and the Soft Close range (page 23/24) for more details.

NOTE: The Hideaway Compact range is designed for residential use and is not recommended for commercial applications. Its use in this application will void the warranty.

KC50SCD-W / Door Pull / Arctic White

Ideal for a larger family kitchen.

NOTE: Bucket is nominal 50L size, actual capacity is 46L.

INSTALLATION INSTRUCTIONS - All measurements given are internal (wall to wall) and are the minimum required to fit each unit.

IMPORTANT NOTE FOR HANDLE PULL MODELS - Allowance should be made for the width of the bin to clear the door and hinge mechanisms. For top mounted models, installation also requires that the top door hinge be 150mm from the top of the door to allow clearance for the bin handle.

SPACE RESTRICTIONS?

HIDEAWAY FLOOR MOUNT SOLUTIONS

When it's not possible to find space to mount your bin at bench height, Hideaway has a range of bin solutions that can mount to the base or floor of a cabinet and fit around existing plumbing.

Single bucket options are suitable for small spaces, such as bathroom vanities or tight under sink spaces. Double bucket models can be used for waste and recycling where space allows. Installation is simple, making these a great option for DIY projects or retrofitting to existing cabinets.

A fully enclosed, durable, one-piece metal frame means no assembly required. These floor mount bins take just 6 screws into the base of the cabinet and it's installed and ready to use!

COMPACT FLOOR MOUNT MODELS

1 x 15 litre bucket Floor Mounted

(WxHxD)mm 258 x 305 x 358

Available in:
KCF115SCH-W / Handle Pull / Arctic White
KCF115SCH-C* / Handle Pull / Cinder

1 x 20 litre bucket Floor Mounted

(WxHxD)mm 258 x 408 x 358

Available in:
KCF120SCH-W* / Handle Pull / Arctic White
KCF120SCH-C / Handle Pull / Cinder

2 x 15 litre buckets Floor Mounted

(WxHxD)mm 298 x 308 x 510

Available in:
KCF215SCH-W* / Handle Pull / Arctic White
KCF215SCH-C / Handle Pull / Cinder
KCF215SCD-W / Door Pull / Arctic White
KCF215SCD-C / Door Pull / Cinder

2 x 20 litre buckets Floor Mounted

(WxHxD)mm 298 x 408 x 510

Available in:
KCF220SCH-W / Handle Pull / Arctic White
KCF220SCH-C / Handle Pull / Cinder
KCF220SCD-W / Door Pull / Arctic White
KCF220SCD-C* / Door Pull / Cinder

COMPACT RANGE FEATURES: Refer page 27

FLOOR MOUNT INSTALLATION INSTRUCTIONS - All measurements given are internal (wall to wall) and are the minimum required to fit each unit.

IMPORTANT NOTE FOR HANDLE PULL MODELS - Models KCF115SCH, KCF120SCH, KCF215SCH, KCF220SCH - if hinges are used that do not allow the door to clear the opening fully, allow an extra 10mm width (check as this may vary).

MORE THAN JUST A BUCKET

CR400-215D-W

HIDEAWAY 35L & 40L BUCKETS WITH UNIQUE AIR VENT SYSTEM

Four air vents allow trapped air to escape through the lip of the bucket, as the bin liner is filled during use. This unique design will eliminate the frustration of trapped air restricting your liner, maximising bin liner volume.

MATERIALS: DURABLE, FOOD-GRADE AND RECYCLABLE

Hideaway buckets are made with virgin polypropylene, giving them the durability to cope with the tough daily demands of the kitchen environment. The food-grade polypropylene material is FDA (U.S.A) approved, meaning Hideaway buckets can be used for bulk food storage of dry food stuffs. At the end of the life-cycle, the bucket is fully recyclable to minimise environmental impact.

LINER HOLDERS

All buckets used in Hideaway Bins come with matching liner holders, to hold bin liner bags in place. This not only looks tidy, it keeps your bin liner clean for removal and ensures the liner bags don't slip inside the bucket.

Black

Electronic Push to Open Kit

Available from leading hardware suppliers, for Concelo (and Compact KC30SCD and KC40SCD models)

Concelo is warranted for use with Häfele Grass Sensomatic or Blum Servo Drive systems. See page 12 for more information. Refer to the technical guides on the Hideaway website for installation of electronic systems.

Top Mount Bracket Kit

To mount Concelo bins in an over width cabinet
CRTMB Cinder

Push to Open Bracket

Available from Hideaway, for Concelo Bin models: White or Cinder

To work with electronic push to open systems. Not required in some applications. Refer to the technical guides on the Hideaway website for installation of electronic systems.

HIDEAWAY BINS ARE PROUDLY DESIGNED AND MADE IN NEW ZEALAND BY KITCHEN KING® LTD AND HAVE A STRONG LOCAL AND INTERNATIONAL REPUTATION FOR THE QUALITY AND INNOVATION OF OUR HIDDEN WASTE, RECYCLING AND LAUNDRY SOLUTIONS.

Kitchen King is a 100% family owned and operated business and has been under the direction of the Bertelsen family since 2006. Our company is run with joint directorship by close father and daughter team, Allen and Jamie Bertelsen.

Our team at Kitchen King not only manufacture and distribute Hideaway Bins but have expanded to include research and design, to ensure we are able to release new and innovative products to the market.

With an industry leading engineering and manufacturing process the team at Kitchen King continue to produce creative solutions for both residential and commercial storage, waste and recycling requirements.

METAL COMPONENTS

Hideaway Bins work closely with New Zealand's leading sheet metal manufacturers and aluminium extruders to produce our metal components.

We use electro-galvanised steel for our sheet metal components. This has a smooth consistent thin layer of zinc to provide corrosion resistance and has a consistent surface for an excellent finish when powder coated.

Our sheet metal suppliers utilise cutting edge sheet metal technology, including fibre laser cutters, turret punches, CNC folders and laser welding. This delivers high quality precision components which ensures the quality and reliability of all Hideaway Bins.

UNIQUE POWDER COATING

All metal components are powder coated to provide a tough yet attractive finish. To improve the overall resistance of the coating, all individual metal parts undergo an iron phosphate pre-treatment and are then subjected to an acidic bath.

The powder coat is then electrostatically charged to ensure even coverage, and applied manually using a hand gun to ensure maximum coverage. The powder coating is then cured under heat to allow it to form a hard finish.

PLASTIC COMPONENTS

We partner closely with leading plastic injection moulding suppliers. This gives us access to specialist skills and manufacturing machinery, allowing full control over the plastic injection moulding processes ensuring Hideaway Bins stringent quality standards are met.

All plastic components are made using virgin material for maximum durability. While using virgin material is more expensive, it means the strength of the components are not compromised by using fillers. At the end of their life, all parts are all fully recyclable to ensure minimal environmental impact.

Our buckets are made using a food-grade polypropylene material which is FDA (U.S.A) approved meaning they can also be used to store dry food stuffs.

BIN ASSEMBLY

Once all Hideaway Bin components are ready for assembly, our product technicians assemble the bins at our warehouse in Silverdale, Auckland, NZ. This assembly process allows for all parts to be checked to ensure the highest quality end product.

We won!

reddot award 2019 winner

Concelo.
BY HIDEAWAY

"A sophisticated product solution, this kitchen waste bin convinces thanks to its automatic, odour controlling closing mechanism."
- Judge's comment, Germany 2019

A ONCE IN A LIFETIME RED DOT AWARD! A MILESTONE FOR HIDEAWAY AND FOR NEW ZEALAND PRODUCT DESIGN.

The prestigious international Red Dot Design Awards pay tribute to the best manufacturers and designers of the year. In 2019 there were 5,500 entries from around the world, and only the best products convinced the experts. The manufacturers and designers from the international design scene that created these products were honoured and celebrated on 8 July 2019, at the Red Dot award ceremony in Essen, Germany.

Allen and Jamie enjoyed celebrating this honour in Germany and found themselves mixing among some of the best design companies in the world such as Ferrari, (who won the Design Team of the Year) as well as Apple, Bosch, Grohe, Hyundai, LG, Philips and Sony to name a few.

The Concelo waste bin is now on display in the Red Dot Museum in Essen, alongside other award-winning products. It is also forever featured in the 2019 Red Dot DOING year book where the international design community draw inspiration for future products and stay on top of the latest product trends paving the way forward.
