THE ART OF EFFORTLESS WASTE MANAGEMENT
MEETS THE ENGINEERING BEHIND EVERY MOVEMENT

NOVER

Concelo® entro® is the perfect pairing of Concelo's state-of-the-art waste management and Blum's world-class drawer technology. Designed to integrate seamlessly into Blum drawers, it offers effortless cleanliness, controlled odours and moisture, and a precise, fluid closing motion.

Concelo

- The best in waste management, with its award winning easy clean system and active lid technology.

Colour matched to Silk White and Orion Grey, it blends beautifully with your kitchen design while maintaining consistent drawer performance and streamlined assembly. The System 32 drilling pattern ensures easy installation.

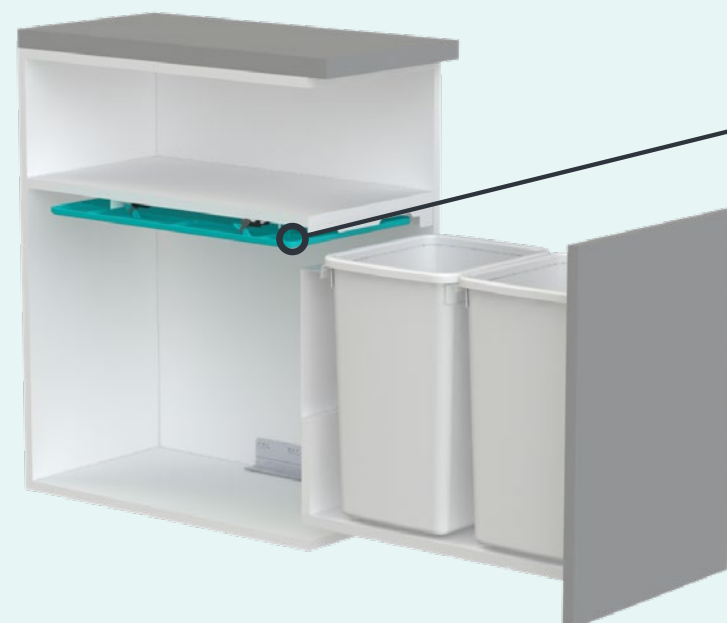

entro

- Meaning within, signifying seamless integration.

INTELLIGENT ODOUR CONTROL WITH ACTIVE LID TECHNOLOGY

TACKLE ODOURS AND MOISTURE WITHOUT LIFTING A FINGER

- Hidden Active Lid – Drops down over the buckets when the drawer closes, trapping in odours and moisture – no need to remove a lid from your bin.
- Hands-Free Design – The lid moves in harmony with the opening and closing action of the drawer, allowing for a hands-free waste disposal experience.
- Easy Maintenance – A clever lid tool to allow quick removal for cleaning and re-installation.

Active Lid drops down over the buckets when the bin is closed.

No more dirt traps!
Clip'n'Clean components allow easy access to clean between the bin frame and door front.

Concelo entro - the perfect pairing of state of the art waste management inside Blum's world-class drawer technology.

CLIP'N'CLEAR SYSTEM

Keep your bin looking and smelling fresh with effortless removal and cleaning. The unique Clip'n'Clean System creates an easy cleaning process in just 3 simple steps:

- 1 Effortless removal
- 2 Wash in warm soapy water
- 3 Reinstallation within moments

kitchen

commercial

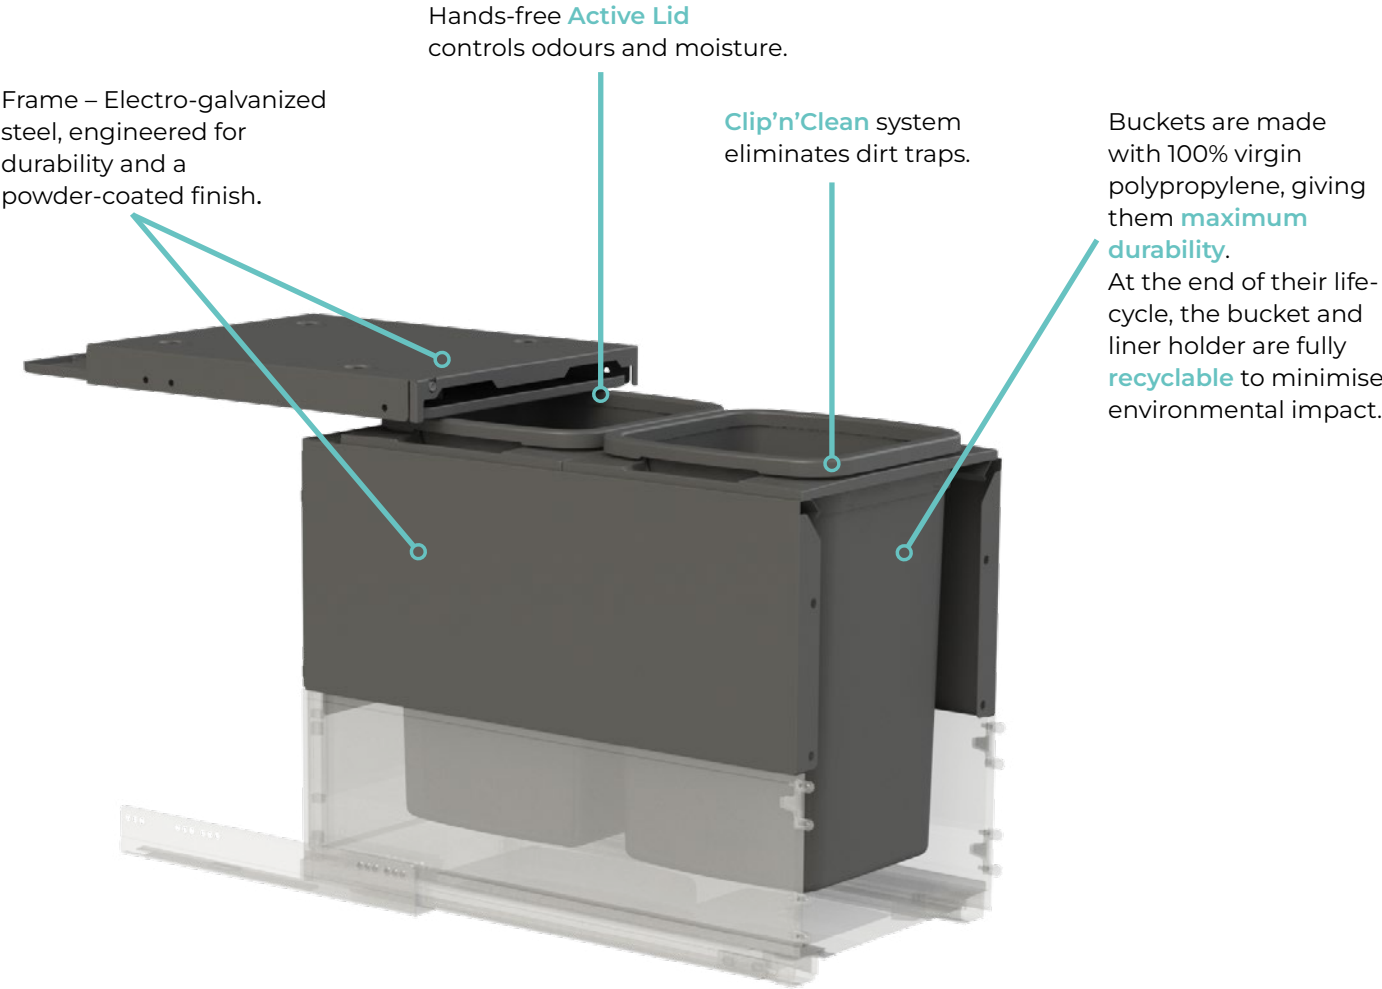

recycle

- 10 year residential
- 2 year commercial

Compatible with **SERVO-DRIVE** electrical opening support system to provide a true **hands-free waste system**.

The Concelo entro bin has perfectly flush sides for seamless integration with Blum drawers. Designed for Blum's LEGRABOX & MERIVOBX 550mm drawers to allow easy access to the rear bucket.

BENCH OVERHANG CLEARANCE Concelo entro bins have been designed with Blum 550mm drawer runners which allow for a maximum bench overhang of 30mm assuming the unit is installed at the top of the carcass. This allows the back bucket to come clear independent of the front bucket. If more bench overhang clearance is required, please mount the bin lower in the cabinet.

*Assumes 16mm carcass.

Easy Installation

The Concelo entro bin system is supplied with drilling templates and uses system 32 drilling for complete compatibility with Blum drawers.
